

AI-Powered Smart Prescription Assistant From Prescription to Recovery

Understanding your prescription shouldn't require a medical degree.

Millions Leave the Hospital Confused

Which medicine?

When to take it?

Food interactions?

Missed a dose?

Confusion leads to medication errors, missed doses, and unnecessary hospital revisits.

One Platform. The Entire Journey.

End-to-End AI Healthcare Companion

We don't just digitize prescriptions — we guide patients from day one to full recovery.

Handwritten prescriptions decoded instantly — doctor info, medicines, dosage, frequency, duration.

Every medicine explained: why it's prescribed, how to take it, side effects, and storage.

Personalized guidance in the patient's language, powered by Google Gemini 2.5 Flash.

Smart Chronic Care Management

Built for Long-Term Conditions

- Daily medicine reminders
- Refill alerts before you run out
- Adherence tracking over time
- Family prescription management

Cost-Saving Engine

Branded Medicine

AI Food Recognition & Health Assistant

Just Snap a Photo

Upload a meal photo. AI identifies the food, checks for medicine interactions, and suggests better alternatives for your condition.

Ask Anything, Anytime

Conversational AI answers: *"Can I take this before food?"* · *"Can I skip today's dose?"* · *"Is this fruit safe?"*

Why We're Different

Traditional Apps

Prescription OCR only

Basic medicine search

Simple reminders

Generic diet apps

Our Platform

End-to-end AI
companion

Personalized medicine
intelligence

AI + cost savings +
shopping

Disease-aware
nutrition guidance

Technology Stack

Frontend

React · Vite · Tailwind CSS

Backend

Node.js · Express.js · MongoDB Atlas

AI Engine

Google Gemini 2.5 Flash (Multimodal)

Infrastructure

Cloudinary · Google Maps API · n8n

JWT + bcrypt authentication · Prescription-only medicines protected by backend validation

The Road Ahead

1

Phase 1

WhatsApp & SMS reminders

2

Phase 2

Wearable integration · Doctor dashboard

3

Phase 3

Pharmacist portal · EHR integration

4

Phase 4

Voice-based healthcare assistant

We don't just read prescriptions. **We help patients recover better.**
